Business Insights for Bright Motors

This report covers:

Problem Identification — identifying underperforming makes, sellers, regions and inventory issues that are negatively impacting profitability.

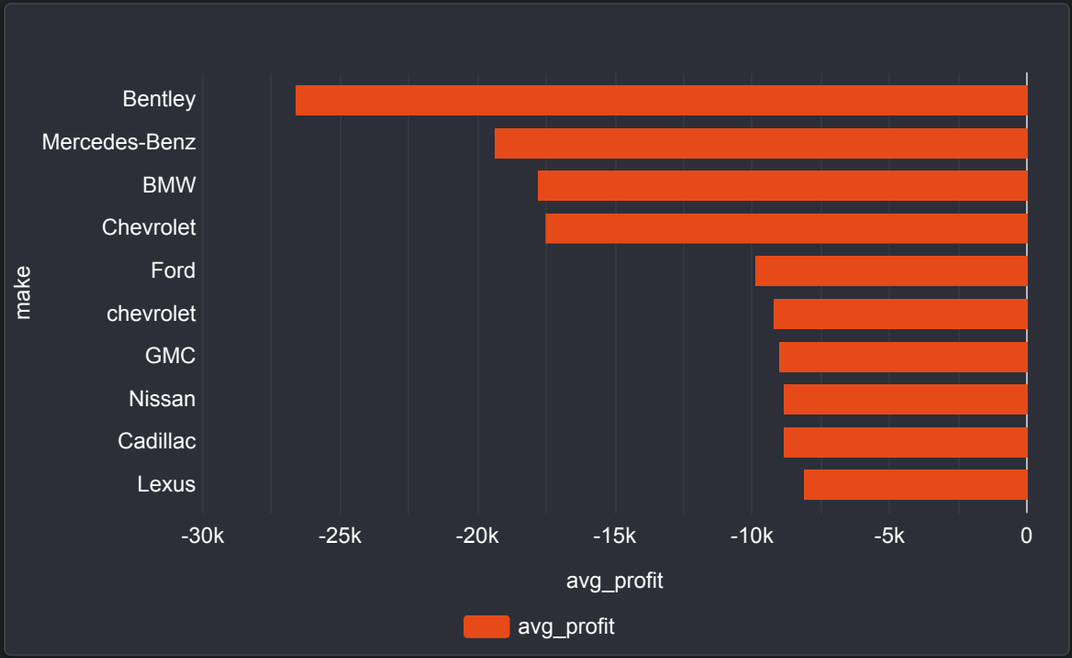
Historical vs Recent Analysis — analyzing sales trends, pricing patterns and regional performance over time to understand how the business has changed

Solutions from the Data — data driven recommendations on which makes to stock, which regions to expand into, optimal pricing strategies and which sellers to partner with

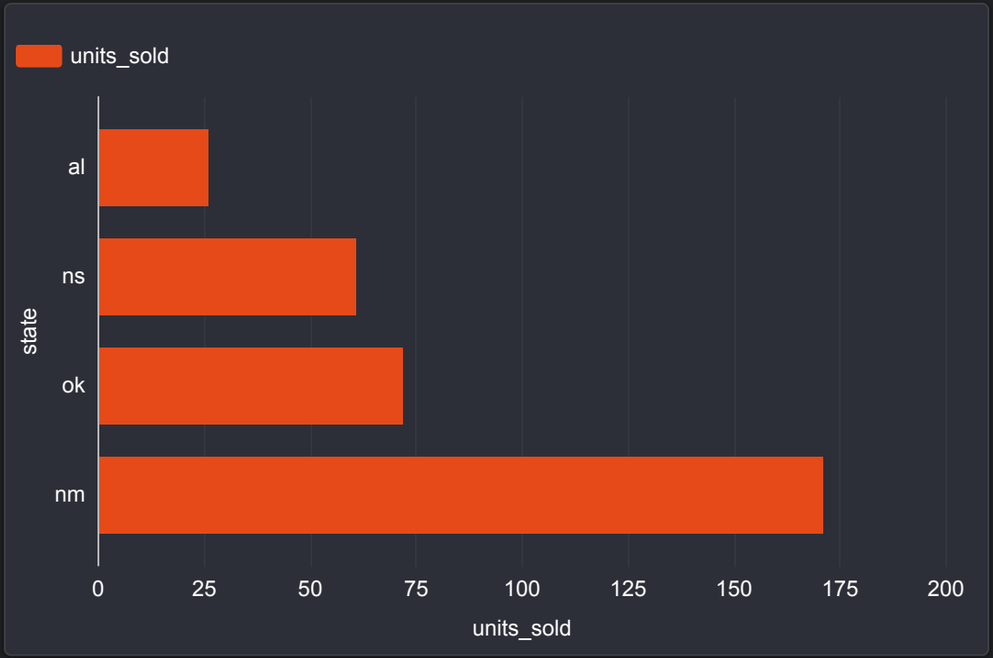
Section 1: Problem Identification

body_type | sale_year | state

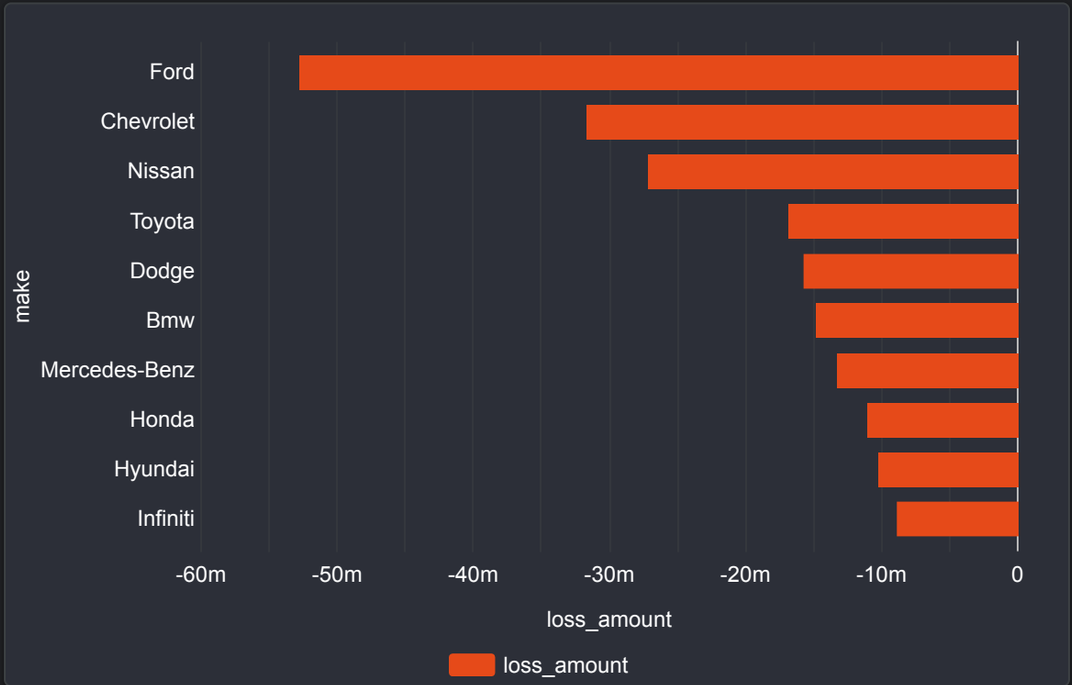
Makes with Negative Profit Margins



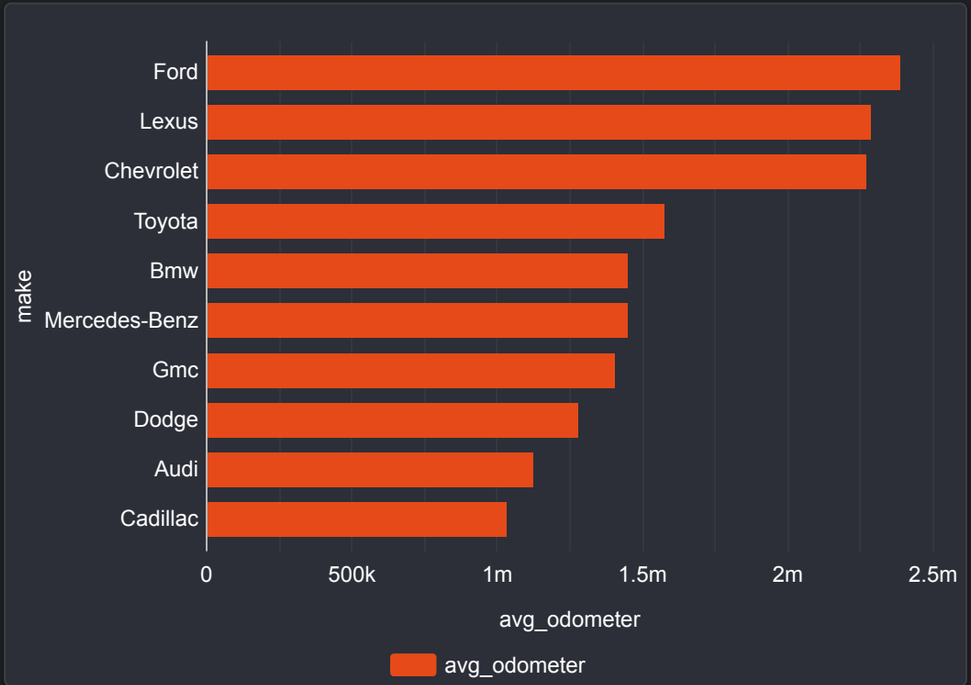
States with the Lowest Sales Volumes



Cars Sold Below Market Value

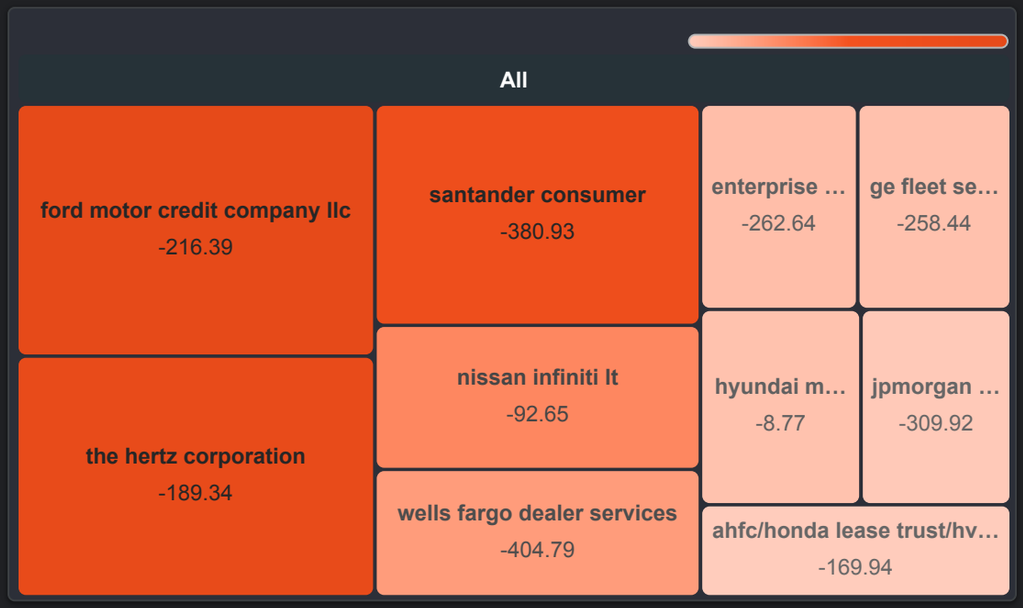


High Mileage Cars Sold Above Average Price

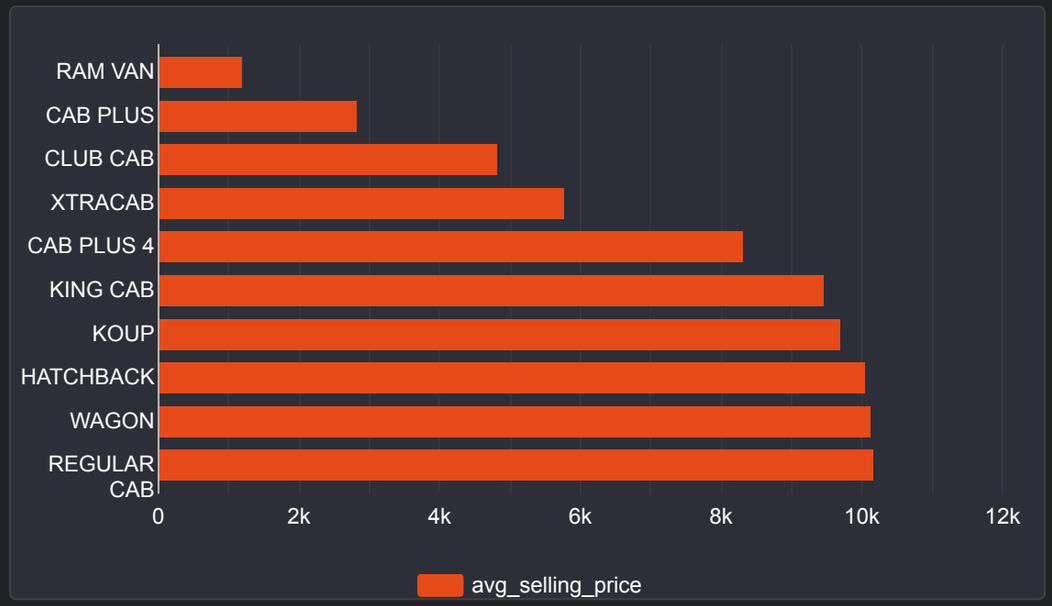


body_type | sale_year | state

Top 10 Sellers Selling Below Market Value



Body Types with Lowest Average Selling Price



Percentage of Records Missing Condition Score

missing_pct
2.11
